FUJICURE 5003

FUJICURE 5003 is an epoxy-curing agent of modified cycloaliphatic polyamine. This curing agent has good compatibility with epoxy resins and coal tar. The curing of FUJICURE 5003 is excellent under high humid conditions or on the surface of the damp. It has good chemical and blush resistance. The application of FUJICURE 5003 is mainly for coatings and linings under cool, damp conditions.
